Reviewer acknowledgement

The Editors and Publishers are most grateful to the following people who kindly reviewed articles submitted to *Journal of Electromyography and Kinesiology* in 1992–1993. Without their expertise and generosity, we would be unable to maintain the high standards for which we strive:

G Agarwal
G Anderson
R Baratta
H J Biedermann
F Bosman
M Broekhuysen
Naoichi Chino
B Day
C J Erkelens
R Glaser
G Gottlieb
R Gregor
G Hägg
K Hayes
G F Inbar
R F M Kleissen
M Naeije
B Otten
P Pinelli
D Popovic
J P Roll
J B J Smeets
D Stashuk
M Stokes
W Troni
P H Veltink
J D van Willigen

Index: Volume 3 1993

Subject index

adaptation
  feedback, kinematics, shape invariance, electromyography, 112
aerobic metabolism
  motor unit, ischaemia, tendon reflex, needle electrode, 183
amplitude normalization techniques
  EMG, maximum voluntary isometric contractions, stretch-shortening cycle, 236
assistive technology
  tremor, orthotics, motor control, rehabilitation engineering, 131
biceps brachii
  stretch reflex, variability, human, 24
biomechanical models
  joint modelling, human joint mechanics, car crash, passenger simulation, 221
biomechanics
  muscle coordination, locomotion, electromyography, statistics, 51
car crash
  joint modelling, biomechanical models, human joint mechanics, passenger simulation, 221
cat gastrocnemius
  high-frequency antidromic stimulation, spindle afferents, 41
coactivation
  electromyogram, motor units, recruitment, 33
cortical mapping
  single motor unit potentials, magnetic stimulation, motor neuron disease, motor evoked potential, 245
depolarization propagation velocity
  extracellular potential power spectrum, finite length muscle fibre, electrode longitudinal position, intracellular action potential duration, 195
dynamic contractions
  muscle fatigue, isometric contractions, median power frequency, 214
dynamic exercise
  muscle performance testing, electromyography, motor control, 78
electrode array
  EMG, fatigue, polarity correlation, 231
electrode longitudinal position
  extracellular potential power spectrum, finite length muscle fibre, depolarization propagation velocity, intracellular action potential duration, 195
electromyogram
  coactivation, motor units, recruitment, 33
electromyographic signal simulation, 157
electromyography
  human muscle, partition, lateral gastrocnemius, 87
  dynamic exercise, muscle performance testing, motor control, 78
  feedback, adaptation, kinematics, shape invariance, 112
  muscle activation patterns, posture and movement, impulse-momentum principle, human stance, 149
  kinematics, scaling, shape invariance, shoulder, 13
  muscle coordination, biomechanics, locomotion, statistics, 51
EMG
  torque, muscle, impulse response, motor units, 67
  power spectrum, masseter, isometric contraction, 205
  fatigue, polarity correlation, electrode array, 231
  amplitude normalization techniques, maximum voluntary isometric contractions, stretch-shortening cycle, 236
EMG signal
  innervation zone, fatigue, neuromuscular disorders, 174
extracellular action potential
  intracellular action potential, isolated frog muscle fibre, radial distance, muscle fibre conduction velocity, 95
extracellular potential power spectrum
  finite length muscle fibre, electrode longitudinal position, depolarization propagation velocity, intracellular action potential duration, 195
fatigue
  innervation zone, EMG signal, neuromuscular disorders, 174
  EMG, polarity correlation, electrode array, 231
feedback
  adaptation, kinematics, shape invariance, electromyography, 112
finite length muscle fibre
  extracellular potential power spectrum, electrode longitudinal position, depolarization propagation velocity, intracellular action potential duration, 195
functional electrical stimulation

quadriceps muscles, paraplegia, isokinetics, muscle fatigue, 3
head
jaw, tracking, visual feedback, motor control, 103
high-frequency antidromic stimulation spindle afferents, cat gastrocnemius, 41
human
biceps brachii, stretch reflex, variability, 24
human joint mechanics
joint modelling, biomechanical models, car crash, passenger simulation, 221
human muscle
partition, lateral gastrocnemius, electromyography, 87
human stance
electromyography, muscle activation patterns, posture and movement, impulse-momentum principle, 149
impulse response
EMG, torque, muscle, motor units, 67
impulse-momentum principle
electromyography, muscle activation patterns, posture and movement, human stance, 149
innervation zone
EMG signal, fatigue, neuromuscular disorders, 174
intracellular action potential
extracellular action potential, isolated frog muscle fibre, radial distance, muscle fibre conduction velocity, 95
intracellular action potential duration
extracellular potential power spectrum, finite length muscle fibre, electrode longitudinal position, depolarization propagation velocity, 195
ischaemia
motor unit, tendon reflex, needle electrode, aerobic metabolism, 183
isokinetics
quadriceps muscles, functional electrical stimulation, paraplegia, muscle fatigue, 3
isolated frog muscle fibre
intracellular action potential, extracellular action potential, radial distance, muscle fibre conduction velocity, 95
isometric contraction
EMG, power spectrum, masseter, 205
isometric contractions
muscle fatigue, dynamic contractions, median power frequency, 214
jaw
head, tracking, visual feedback, motor control, 103
joint modelling
biomechanical models, human joint mechanics, car crash, passenger simulation, 221
kinematics
feedback, adaptation, shape invariance, electromyography, 112
scaling, shape invariance, electromyography, shoulder, 13
lateral gastrocnemius
human muscle, partition, electromyography, 87
locomotion
muscle coordination, biomechanics, electromyography, statistics, 51
magnetic stimulation
single motor unit potentials, motor neuron disease, motor evoked potential, cortical mapping, 245
masseter
EMG, power spectrum, isometric contraction, 205
maximum voluntary isometric contractions
EMG, amplitude normalization techniques, stretch-shortening cycle, 236
median power frequency
muscle fatigue, isometric contractions, dynamic contractions, 214
motor control
dynamic exercise, muscle performance testing, electromyography, 78
jaw, head, tracking, visual feedback, 103
tremor, orthotics, assistive technology, rehabilitation engineering, 131
motor evoked potential
single motor unit potentials, magnetic stimulation, motor neuron disease, cortical mapping, 245
motor neuron disease
single motor unit potentials, magnetic stimulation, motor evoked potential, cortical mapping, 245
motor unit
ischaemia, tendon reflex, needle electrode, aerobic metabolism, 183
motor units
EMG, torque, muscle, impulse response, 67
electromyogram, coactivation, recruitment, 33
muscle
EMG, torque, impulse response, motor units, 67
muscle activation patterns
electromyography, posture and movement, impulse-momentum principle, human stance, 149
muscle coordination
biomechanics, locomotion, electromyography, statistics, 51
muscle fatigue
isometric contractions, dynamic contractions, median power frequency, 214
quadriceps muscles, functional electrical stimulation, paraplegia, isokinetics, 3
muscle fibre conduction velocity
intracellular action potential, extracellular action potential, isolated frog muscle fibre, radial distance, 95
muscle performance testing
dynamic exercise, electromyography, motor control, 78
needle electrode
motor unit, ischaemia, tendon reflex, aerobic metabolism, 183
neuromuscular disorders
innervation zone, EMG signal, fatigue, 174
orthotics
tremor, motor control, assistive technology, rehabilitation engineering, 131
paraplegia
quadriceps muscles, functional electrical stimulation, isokinetics, muscle fatigue, 3
partition
human muscle, lateral gastrocnemius, electromyography, 87
passenger simulation
joint modelling, biomechanical models, human joint mechanics, car crash, 221
polarity correlation
EMG, fatigue, electrode array, 231
posture and movement
electromyography, muscle activation patterns, impulse-momentum principle, human stance, 149
power spectrum
EMG, masseter, isometric contraction, 205
quadriceps muscles
functional electrical stimulation, paraplegia, isokinetics, muscle fatigue, 3
radial distance
intracellular action potential, extracellular action potential, isolated frog muscle fibre, muscle fibre conduction velocity, 95
recruitment
electromyogram, coactivation, motor units, 33
rehabilitation engineering
tremor, orthotics, motor control, assistive technology, 131
scaling
kinematics, shape invariance, electromyography, shoulder, 13
shape invariance
feedback, adaptation, kinematics, electromyography, 112
kinematics, scaling, electromyography, shoulder, 13
shoulder
kinematics, scaling, shape invariance, electromyography, 13
single motor unit potentials
magnetic stimulation, motor neuron disease, motor evoked potential, cortical mapping, 245
spindle afferents
high-frequency antidromic stimulation, cat gastrocnemius, 41
statistics
muscle coordination, biomechanics, locomotion, electromyography, 51
stretch reflex
bicep brachii, variability, human, 24
stretch-shortening cycle
EMG, amplitude normalization techniques, maximum voluntary isometric contractions, 236
tendon reflex
motor unit, ischaemia, needle electrode, aerobic metabolism, 183
torque
EMG, muscle, impulse response, motor units, 67
tracking
jaw, head, visual feedback, motor control, 103
tremor
orthotics, motor control, assistive technology, rehabilitation engineering, 131
variability
biceps brachii, stretch reflex, human, 24
